

Greetings,XM instant traffic and weather is by far more important to me during my work day, because being an over the road driver, I can do enroute trip planning, far enough in advance that I can save time, fuel and choose safer routes, long before I get into the local broadcast area. Restricting XM instant traffic and weather would be an injustice to all of us who subscribe to XM. I urge FCC to reject petition 04-160, and encourage XM to expand its coverage of local traffic and weather. This service is too valuable a tool to have silenced.

Regards,

Michael McMahon
